

SOC Incident & Forensic Analysis Report

Generated At: 2026-05-05 16:10:13

Severity Level: MEDIUM

Open Ports: 8

Safe Ports: 42

Indicators of Compromise

No major IOC detected

System Info

System: Windows

Node Name: Sidhima

Release: 10

Processor: AMD64 Family 25 Model 80 Stepping 0, AuthenticAMD

CPU Usage: 20.5%

Memory Usage: 84.8%

Host Scan

```
{'127.0.0.1': {'state': 'up', 'protocols': {'tcp': [{'port': 80, 'state': 'open', 'service': 'http'}, {'port': 135, 'state': 'open', 'service': 'msrpc'}, {'port': 443, 'state': 'open', 'service': 'http'}, {'port': 445, 'state': 'open', 'service': 'microsoft-ds'}, {'port': 903, 'state': 'open', 'service': 'vmware-auth'}, {'port': 2323, 'state': 'open', 'service': 'http'}, {'port': 3306, 'state': 'open', 'service': 'mysql'}, {'port': 5000, 'state': 'open', 'service': 'http'}]}}}
```

Recommendations

- HIGH RISK: Too many open ports detected.
- Close unnecessary ports using firewall rules.
- Disable unused services immediately.
